

Neolokal — Executive Summary

March – May 2026 | Three-Month Programme Overview

PART 1 — May 2026 Monthly Brief

Welcome to May

This month's data tells two very different stories within one team.

FOH is performing at its strongest since the programme began, while BOH is going through its most challenging period. Both stories matter — and both are part of the same restaurant.

Key takeaways:

- 175 total check-ins across 5 active weeks
- FOH strongest month yet — 3.08–3.65 across all dimensions
- BOH near-floor scores — averaging 1.5 across all five dimensions
- Week of May 19–23 most critical — 78 BOH responses averaging 1.2
- BRW wellness session Friday May 8 — FOH strongest readings of the programme immediately after
- FOH participation declining three months in a row — 123 → 82 → 63
- BOH participation growing — 49 → 107 → 112

PART 2 — Three-Month Observations (March – May 2026)

The Bigger Picture — March to May

Three months of data reveals two clear trajectories. FOH has shown consistent resilience — dipping in April and recovering strongly in May. BOH has moved in the opposite direction, dropping from the strongest team in March to the most strained in May. Recovery has been the lowest dimension every month for both teams — this points to something structural that needs direct attention.

Key takeaways:

- FOH: V-shape — March strong, April dip, May strongest yet
- BOH: March 3.6–4.1 → April 2.5–2.9 → May 1.5 — a 2.5-point drop in two months
- Recovery declining every month across both teams — structural attention needed
- In-person BRW session May 8 — immediate, measurable FOH improvement
- FOH and BOH are one team — FOH strength is an asset for BOH recovery right now

PART 3 — Looking Ahead to Month 4

What to Focus on Coming Into Month 4

The BOH situation is the most urgent priority — a direct conversation between ownership and the kitchen team is the most important next step.

Key takeaways:

- Address the BOH situation directly — do not wait
- Rebuild FOH participation — three consecutive months of decline needs action
- Continue in-person BRW engagement — the data shows it works
- Recovery support for both teams — BRW resources coming
