

Neolokal Daily Pulse

Monthly Summary | April 9 – May 9, 2026

Confidential — Management & Leadership Only

Overview

- 189 total check-ins this month (up from 172 in March)
- 5 active weeks of data

The Big Picture — Scores Are Down

- Every single dimension dropped by roughly 0.7–0.9 points compared to last month
- All five dimensions now sit below 3.0 except Work Environment
- This is not a one-week blip — it is a consistent decline across the whole team

Participation — A Flip

- BOH doubled their check-ins: 49 last month → 107 this month ✓
- FOH check-ins dropped: 123 last month → 82 this month ⚠
- Both trends need to be discussed with team leads

FOH vs. BOH — Roles Have Reversed

- Last month BOH scored higher than FOH — this month it is the opposite
- FOH is holding moderate (3.1–3.4 range)
- BOH is significantly lower (2.5–2.9 range) — the kitchen team is under more strain than the floor right now

The Weekly Story

- Week 1 (Apr 9–11): Strong start ●
- Week 2 (Apr 14–18): First noticeable dip ○
- Week 3 (Apr 21–25): Continued decline ●
- Week 4 (Apr 28–May 2): Critical low — lowest scores of the entire period ●
- Week 5 (May 5–9): Encouraging rebound across all dimensions ○

Why Are Scores Low?

- 67–71% of FOH low scores are attributed to professional/work-related causes
- The work environment is the primary driver — not personal factors

What Needs a Conversation

- What happened operationally during **April 28–May 2** that drove scores to their lowest point? Both FOH (low on Tuesday Apr 28) and BOH (critical low on Wednesday Apr 29 and Thursday Apr 30) were affected at different points in the week.
- What is driving the BOH strain this month?
- Why did FOH check-ins drop by 41 responses compared to March?
- What is making Wednesdays the hardest day of the working week?
